USER GUIDE - Preventive Services – *Hepatitis Control Services*

Facility Description

Write the name of Health Facility. Tick against the category in which this HF falls.

Details on available Preventive Programs Services (To fill this section use data of previous month)

Hepatitis Control

The supervisor will check the registers maintained to note the number of patients screened through ICT, registered/positive (ICT and ELISA positive) at sentinel site in last month. Tests mentioned in the checklist will be recorded for each category.

ICT stands for immuno-chromatographic test for hepatitis screening. **ELISA** test is done for the confirmation of hepatitis. Polymerase Chain Reaction (**PCR**) test is conducted to assess the severity of the disease and prognosis of the case.

Overall observation and summary of findings/recommendations or follow up actions

The supervisor will note the feedback or responses given by facility staff. Enlist the main problems identified during the visit and remedies/actions suggested with responsibility fixed in a given timeframe.

After filling the checklist the monitor will write his name, designation and date of the visit.
